

Title: Safety Classification for  
I&C Systems in Nuclear Power Plants -  
Current Status & Difficulties  
Produced by: World Nuclear Association  
Published: September 2015  
Report No. 2015/008

# Contents

Foreword	1
Executive summary	3
1. Introduction	4
1.1 Background	4
1.2 Objective	4
1.3 From process design to I&C design	4
2. Generic approach for I&C safety classification	6
2.1 IAEA SSG-30 – Safety Classification of Structures, Systems and Components in Nuclear Power Plants	7
2.2 IEC standards	8
2.2.1 IEC 61226 (IEC Level 2 document)	8
2.2.2 IEC 61513 (IEC Level 1 document)	8
2.2.3 IEC TR 61838 (IEC Level 4 document)	8
2.3 Comparison of I&C classification	8
3. Causes of classification difficulties	10
3.1 Inconsistency between international standards and local regulations	10
3.2 Ambiguous requirements for safety classification	10
3.3 Incomplete rules for categorization of 'other I&C functions'	11
3.3.1 I&C functions for support service systems	11
3.3.2 Support service functions for electrical/mechanical systems	12
3.3.3 I&C service functions for main I&C systems	12
3.4 Criteria for diverse backup systems	12
4. Differences between IAEA SSG-30 and IEC 61226	14
5. Develop 'bridges' between codes and standards for I&C safety classification	15
6. References	16
Annex 1: Plant states – sequence of events	17
Annex 2: DICTF actions for "Safety Classification for I&C systems in nuclear power plants"	26
